To Whom It May Concern:

This is a letter of recommendation for Andy Smith and Ray Morgan Co. Recently the Sacramento office of ENTRIX was in need of upgrading its color production capabilities, and our incumbent equipment provider offered an upgrade that left much to be desired. Andy and RMC came onto the scene, managing to outbid the incumbent and replace their under-performing equipment with a state-of-the-art Canon C3200 color copier/printer/fax/scanner that has everyone in the office satisfied and, in some cases, grateful.

ENTRIX, Inc. is a consulting services company serving private industry and government agencies in a highly competitive market. In order to compete successfully, we must meet high production expectations. It took several months of testing and consensus-building to finally get approval from management and coworkers on the equipment and lease terms, but Andy worked with us the entire time, demonstrating endless patience and a can-do attitude. No games, no stonewalling.

After two months of heavy use, I'm happy to report that the C3200 has increased our production capacity and quality dramatically. RMC has been there for us when we have questions, and the software extras have been a big plus. I highly recommend Andy and Ray Morgan Company for any equipment needs you might have.

Sincerely,

Robert Wurgler
Senior Production Specialist
