To Whom It May Concern:

In November 2003, a decision was made to replace our quick-print capacity which consisted of a 2 headed 3875 Multilith system with five towers. We looked into Xerox, Konica, Heidelberg, Ikon, and Canon with Ray Morgan. After many hours of research, we decided on 2 Canon iR105s with Ray Morgan. We selected Ray Morgan because of their honesty and their sterling reputation.

The equipment was installed at the end of January 2004. Since that time, we have found it trouble free and the technical support we have received from Ray Morgan has been top flight. The quality and speed of production is so much better that it is hard to believe. We run jobs that range from 1 to 1000 originals and 1 to 1500 copies on this equipment. Our production time has been cut in half.

I would not hesitate to recommend Canon and Ray Morgan to anyone! And this recommendation is from a pressman of 35 years who fought using copy machines in the printing industry - until now.
